Continuation of Disposition of Claims: Claims objected to are 6,-7,9,12,17-30,32-50,53-71,73-80,85-99,101-103,107-127,129,132-150,153-157,159-168.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8,13-16,31,51-52,72,81,82,83,84, 100,104-105,128,129,130,131,151,152 and 158 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The terms "capable of, modifying, indicator" in claim 8,13-16,31,51-15,72,81-84,100,104-105,128-131,151-152 and 158 are relative terms which render the claims indefinite. The terms "capable of, modifying, indicator" are not defined by the claims, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Clarification is requested.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Imashiro et al (USP 5,973,024).

Imashiro et al (USP 5,973,024) discloses a method for control degradation rate of a biodegradable plastic (i.e., polylactic acid) which comprises adding a carbodiimide compound to a biodegradable plastic, the carbodiimide compound being a monocarbodiimide compound or polycarbodiimide derived from an aliphatic diisocyanate, an alicyclic diisocyanate or a mixture thereof which anticipates the claimed invention. See abstract; cols. 1-8.

Claims 6-7, 9-12, 17-30, 32-50, 53-71, 73-80, 85-99, 101-103, 107-127, 129, 132-150, 153-157, 159-168 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yagi is cited to show the state of the art of a degrading method for a polymer.
